## Trusted By

## Be The Smartest, Be In Total control

With AI-Enabled video surveillance solution for your manufacturing facilities

### Absolute Visibility

Active monitoring with e-surveillance cameras gives 100% transparency into the functioning of the facility, allowing the user to keep a check on the activities of the employees, adherence to safety protocols, the overall performance of the facility and the health of machinery employed while keeping track of asset movement within the facility.

### Unified Platform

A single unified platform to monitor multiple devices, receive and respond to notifications and video analytics from multiple sites spread across geographical distances resulting in ease of operations. All the sensors, cameras and actuators send and receive their data over the cloud and can be assessed and controlled from a unified platform.

### Remote Control

The IoT-based unified platform allows users to monitor and control multiple sites and all installed devices from any place, provided, the presence of an internet connection. Cameras and sensors installed at the site can be accessed, firmware can be upgraded and the system rebooted, remotely, without any third-party dependency.

## What Our Client Say About Us

Being in the gold loan space, branch safety is a must. IGZY works on a transparent & 100% visibility approach giving us peace of mind and timely delivery with proactive alerts & agile working mechanism. Their unified platform & PAN India presence helped us use our existing resources on a centralised dashboard. Our static hardware is now proactive and actionable thus enhancing our security parameters. We are really impressed and happy to have IGZY as our business partner.

**Admin Head, SBFC**

SBFC Finance Private Limited

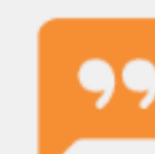

IGZY, has been a reliable & trustworthy security solution partner in our success journey. Their sensors, cameras and platform provide us with a robust infrastructure for security. Their command centre services, allow us to be a little less worried about the security of our premises. The support team is ready with a prompt response.

**Prasad Nair**

The Investment Trust of India

We chose IGZY and they gave us all our surveillance and security solutions on a single unified platform. Their platform allows us to make periodic changes remotely without having to depend on local field support to make configuration changes. This in turn allows our branches to function properly without any hindrance. Their command centre is professional and clubbed with their industry-leading technology, IGZY, which provides a comprehensive security solution for our business.
